START HERE:

CONTACT PATIENT CENTRAL

Patient Central is the first place to call after a diagnosis of pancreatic cancer and at any point in your journey. We can answer your questions, and all services are provided free of charge.

877-2-PANCAN patientcentral@pancan.org

SEE A SPECIALIST TO IMPROVE YOUR OUTCOME

Get proper diagnosis and treatment

It is critical to consult with specialists who diagnose and treat a high volume of pancreatic cancer patients. Contact Patient Central for a list of specialists in your area.

KNOW ALL YOUR TREATMENT OPTIONS

Every tumor is different

Molecular testing can give information on your tumor's biology that can be used to identify treatments that may work best for you. Ask us if *Know Your Tumor*® can help.

CONSIDER CLINICAL TRIALS AT EVERY TREATMENT DECISION

Pancreatic cancer patients who participate in clinical research have better outcomes

Clinical trials should be considered during every treatment decision, including at diagnosis. Contact Patient Central or visit clinicaltrials.pancan.org to start your search.

EVERY STEP OF THE WAY:

MAINTAIN GOOD QUALITY OF LIFE

Seeing healthcare professionals who focus on symptom management and supportive (palliative) care, early and throughout your treatment, improves outcomes. This includes seeking good nutritional care, with access to prescribed pancreatic enzymes and a registered dietitian.

HELP ACCELERATE RESEARCH

One way to contribute to research is through our Patient Registry – a database to look for patterns in treatments, side effect management and diagnostics that will lead to improved outcomes for patients. Join today at pancan.org/patientregistry.

WAGE HOPE

No one should face pancreatic cancer alone. Our Survivor and Caregiver Network connects individuals with similar experiences. Or you can bring hope to our community and create more awareness in yours. Visit pancan.org to get involved by donating, volunteering and advocating.
