

# PANCREATIC CANCER FAMILY HISTORY WORKSHEET

Knowing your family's medical history can help you understand your risk of developing pancreatic cancer.

Answer the following questions about your blood relatives.

Who in your family has been diagnosed with and/or has died from cancer?

Name	Relationship	Cancer Type	Age of Diagnosis/ Age of Death

Have multiple family members been diagnosed with pancreatic cancer? \_\_\_\_\_

Have family members in two or more generations, on the same side, been diagnosed with pancreatic cancer? \_\_\_\_\_

Have any family members been diagnosed with pancreatic cancer at age 50 or younger? \_\_\_\_\_

Have any family members been diagnosed with more than one type of cancer? \_\_\_\_\_

Are there any rare **inherited genetic conditions** in your family? \_\_\_\_\_

Which one(s)? \_\_\_\_\_

If you answered "yes" to any of the above questions, consider talking to your doctor or a genetic counselor about your risk for developing pancreatic cancer and eligibility for a screening program.

**Early detection and treatment of pancreatic cancer can greatly improve outcomes.**

Contact Patient Central for resources to find genetic counselors or information about pancreatic cancer risk factors
