Dear Friends,

Picture a pancreatic cancer patient, unsure of where to go to connect with others in their shoes. Or how to get free, personalized information about the disease, and where to access biomarker testing that could lead to better treatment options.

Picture their doctor saying, “I’m sorry, there’s nothing more I can do.”

Picture a pancreatic cancer researcher working on a breakthrough, with only a handful of others doing the same.

This was what the pancreatic cancer landscape looked like before 1999, when PanCAN was formed.

Now, picture a group of passionate and determined people joining together – rolling up their sleeves, ready to help navigate and drive faster and further in the race to beat pancreatic cancer. Asking, “What can I do? How can I help?”

Pamela Acosta Marquardt, our founder, was one of them. Pam jumped in the driver's seat with likeminded people who were asking the same questions.

And now, more people than ever (you included!) are working passionately to fuel this unstoppable movement. And you're not slowing down, as you'll see in our 2022 PanCAN Impact Report, where supporters across the country are pressing the accelerator on progress in a big way.

And they've written postcards of progress to share with you!

There's Dr. Sunil Hingorani in Nebraska, who's dedicated his life to pancreatic cancer research. JB Jaso in Southern California, who's volunteering and advocating in memory of his best friend. Gail Coleman in Virginia, who funds research to keep the legacies of her husband and parents alive. And so many more with inspiring stories to share.

There's a long way to go before we end pancreatic cancer, but we'll get there sooner with you behind the wheel. We saw the pancreatic cancer survival rate move to 11% this year – important progress on the road to our goal of doubling survival by 2030.

Thank you for speeding with us toward a world where pancreatic cancer patients thrive!

Moving forward,

Julie Fleshman
Julie Fleshman, JD, MBA
President and Chief Executive Officer

P.S. The patient you pictured with nowhere to turn? Thanks to you, PanCAN Patient Services has given help and hope to over 200,000 people. And that researcher you pictured, working alone? Because of you, there are over 200 PanCAN donor-funded scientists nationwide, all working toward the breakthrough that changes everything. THANK YOU!

You're Paving the Way for Progress in the Lab

NEBRASKA

Dear PanCAN supporter,

When I cared for my first pancreatic cancer patient, I knew the prognosis was grim. But I was hopeful. That patient was my father. He died less than a year later. I've devoted my life to pancreas cancer patients and clinical research. A 2005 PanCAN Career Development Award funded by donors like you launched my career at Fred Hutchinson Cancer Center in Seattle. With that funding, I got my first lab going. That first grant set me up to get additional funding from the NCI. It supported the development of the first genetically engineered mouse model of pancreatic cancer, which helps us study the disease. It influences my work today at the University of Nebraska Medical Center. I've received other PanCAN grants and I have you to thank for that. You are paving the way for progress in the lab.

Gratefully,

Sunil Hingorani, MD, PhD

Dr. Sunil Hingorani, Recipient, 2005 PanCAN Career Development Award

Recipient, 2017 Pancreatic Cancer Action Network Precision Medicine Targeted Grant funded by 1440 Foundation

Recipient, 2021 Pancreatic Cancer Action Network Precision Medicine Targeted Grant Extension funded by Cheryl and Steve Kole, and Rudy Revak

Member, PanCAN Scientific & Medical Advisory Board

In addition to conducting research and treating pancreatic cancer patients, Dr. Hingorani is a mentor for future scientists and clinicians

Your Research Investment

You helped PanCAN invest a **record-breaking \$25 million in research** this year, benefiting our grants program, PanCAN Precision PromiseSM and the PanCAN Early Detection Initiative.

Since 2003, you've funded **234 grants** for **213 scientists** at **79 institutions**, for a total of **\$174 million!**

This year, you helped award **16 new research grants** and **9 extensions** to support next steps of promising projects, for a record \$10.5 million!

PanCAN published **6 papers** in peer-reviewed biomedical journals and presented **7 posters** at major conferences this year.

For **every \$1 you invested** in PanCAN grant recipients from 2003 to 2019, they went on to receive an average of **\$11.50 in subsequent funding** to support their research.

Together We'll Get to a Brighter Future Faster

Hi everyone –

Brian here, writing to you from my home in Illinois. Our family was blindsided in the fall of 2018 when my wife was diagnosed with pancreatic cancer. After 17 months, Pat went to her heavenly home. The chaos that pancreatic cancer tried to create could not steal our joy for life or destroy our faith and our hope. I decided to give to support the PanCAN Early Detection Initiative because if Pat – and maybe your loved one, too – had been diagnosed sooner, our seven grandchildren could have had more time with their Nana. I believe so strongly in all that we are doing together to end pancreatic cancer that I also got my company to match my recent gift. It's a long road to a cure, but together we can get to a brighter future for patients, FAST.

With love, and in memory of "Nana" Pat,

Brian Gareau

[READ MORE OF MY STORY](#)

The Gareau family

PanCAN Early Detection Initiative

Thanks to you, **nearly 2,300 people** with new-onset diabetes are part of this forward-looking clinical trial that explores whether the link between new-onset diabetes and pancreatic cancer could be useful in developing a pancreatic cancer screening strategy.

Kaiser Permanente Southern California and Baylor College of Medicine/Kelsey-Seybold Clinic are enrolling patients, and Mayo Clinic is expected to open for enrollment in late 2022.

Our goal is to have up to five sites running the study, with 12,500 participants who are representative of the diverse U.S. population. Your support helps us bring together scientists, large healthcare institutions and the federal government, all while instilling a sense of urgency and putting the patient at the center of every decision.

On the Fast Track to Better Treatments

Hi friends –

Joanie and Scott Kriens here, coming to you from Northern California. We are big believers in PanCAN's Precision Promise, which is disrupting the status quo in pancreatic cancer clinical trials to give all patients a longer life. Pancreatic cancer entered our lives when Joanie was diagnosed. Today, five years later, Joanie calls herself a "thrivor." In PanCAN, we've found an excellent organization dedicated to helping patients, as well as one that is breaking barriers. PanCAN is all about innovation and collaboration. Not settling for the status quo. Precision Promise can change the world for patients diagnosed with pancreatic cancer. And that's also why we support PanCAN's new Therapeutic Accelerator Award which, like Precision Promise, broadens the pipeline for new pancreatic cancer treatments. Thank you for going on this ride with us to help fast-track better treatments so ALL patients can thrive.

Sincerely,

Joanie and Scott Kriens, founders of 1440 Foundation

P.S. PanCAN's Therapeutic Accelerator Award is all about innovation, and we know that it's going to give more pancreatic cancer patients more treatment options and more hope.

Joanie Kriens and sons at PurpleStride Silicon Valley 2022

Joanie and Scott Kriens

PanCAN Precision Promise

PanCAN Precision Promise is a groundbreaking new approach to pancreatic cancer clinical trials. It was created to make drug development faster, less expensive, require fewer patients and overall, be much more efficient. You are making this possible.

You're the reason we could open **5 new clinical trial sites** this year, for a total of **22 sites nationwide** and **30 expected by early 2023!**

We selected the new sites based on their strong pancreatic cancer programs and geographic regions that serve a diverse patient population – helping us bring the trial to typically underserved communities.

There are **3 investigational treatments**, and we're expanding eligibility so more patients can participate.

Over **220 patients** have enrolled – all because of you!

Therapeutic Accelerator Award

Directly tied into Precision Promise is the new 2022 Pancreatic Cancer Action Network Therapeutic Accelerator Award supported by 1440 Foundation and the Gail V. Coleman-Kenneth M. Bruntel Research Fund.

With the help of these visionary donors, we're investing **\$3.8 million** toward an early-phase clinical trial testing an investigational treatment combination developed by Verastem Oncology (the inaugural award recipient).

The Therapeutic Accelerator Award seeks to incentivize pharmaceutical and biotech companies to prioritize pancreatic cancer therapies in their early-phase (Phase 1 and 2) clinical trial development. It also aims to de-risk investment in the pancreatic cancer space.

If the experimental treatments in Phase 1 clinical trials are successful, they could go on to later-phase testing as part of the PanCAN Precision Promise clinical trial.

The goal of the PanCAN Therapeutic Accelerator Award is to get new, more effective treatments to pancreatic cancer patients sooner. You're helping us go places needed to improve outcomes for patients.

Gail Coleman at PanCAN Scientific Summit with Verastem Oncology executives Louis Denis, MD, and Jonathan Pachter, PhD, and PanCAN Chief Science Officer Lynn Matrisian, PhD, MBA (left); Gail Coleman and Ken Bruntel (below)

Going Places

Hello, all –

Gail Coleman here, from Alexandria, Va. Pancreatic cancer turned my world upside down. I lost both of my parents and my husband, Ken, to this awful disease. Since Ken's death in 2009 there have been a few new treatments that benefit some patients. But we need much more progress. I've funded PanCAN research grants and believe in the work PanCAN is doing. When I heard about PanCAN's new Therapeutic Accelerator Award and its potential to bring new treatments to patients more quickly, I had to support it. Thank you for all that YOU do to support PanCAN and patients. My mom, dad, and husband would have been blown away by our collective impact against this disease. We're going places together!

In honor of my loved ones and yours,

Gail Coleman

[READ MORE OF MY STORY](#)

Your Impact on the Journey for Patients and Families

Dave Anderson

Dear fellow PanCAN supporters,

My name is Dave and I'm writing to you from Austin, Texas. My first wife, my college sweetheart Dolores, died of pancreatic cancer. We were married 53 years. A few years after I lost Dolores, I remarried but three years later, my second wife Barbara got the same news: pancreatic cancer. It's now been four years since I lost Barbara. PanCAN Patient Services was a big help to us when Barbara was diagnosed. So, when I learned that I could leave a gift to PanCAN in my will – a gift that will help others after I'm gone – I said, Yes! I'll do whatever I can to help make progress against a disease that took my two loving wives. PanCAN is really making a difference thanks to all of you. Have you considered leaving a gift to PanCAN in your will? Everyone should.

Thank you,

Dave Anderson

Let's Keep Blazing Trails Together

Dear PanCAN Friends,

I'm Karyn Temple and I live in Washington, D.C. My father Ronald was a trailblazer. An educator. A mentor. Some of my fondest memories are from road trips on summer vacations – we'd talk about all sorts of things. When he was diagnosed with pancreatic cancer, our family was stunned. Luckily, his oncologist told us to call PanCAN Patient Services. They were a lifeline – the calm within the storm. When I had the opportunity to join the PanCAN Board of Directors, I was grateful. Not only did I want to give back to an organization that had given so much to me and my family, I also wanted to raise awareness about pancreatic cancer within the Black community. Today I work to make sure African Americans know about all that PanCAN provides, free of charge, to patients and families. I hope you'll all continue to blaze new trails with me and work hard to improve the lives of everyone affected by pancreatic cancer.

Much love and hope,

Karyn Temple

PanCAN board member Karyn Temple, moderator of our “Let’s Talk About: Pancreatic Cancer in the Black Community” webinar during Black Family Cancer Awareness Week in June

The discussion featured an all-Black panel sharing their experiences with the disease

“I knew on a fishing trip that I might have pancreatic cancer, based on my symptoms. After the trip, a CT scan and biopsy confirmed it. I’m grateful I found PanCAN Patient Services. They are always there when you need them. I feel so strongly about PanCAN that I’m leaving them a gift in my will. It’s something positive I can do for others who will get this diagnosis.”

– Steve Bothwell, San Diego, CA

Deb Scilingo and her son Anthony, who is also on staff at PanCAN

This year, you helped **253 people** enroll in PanCAN's Know Your Tumor® program to get biomarker and genetic testing that could lead to new treatment options.

People continued to contribute information about their treatment, care and side effects to the **PanCAN Patient Registry** to inform research and help patients for years to come.

693 healthcare professionals are in our PanCAN Patient Champion program, dedicated to referring pancreatic cancer patients to us for more information, services and resources.

You're the Reason I Help Patients Navigate Cancer

Dear PanCAN friends –

I'm Deb, a PanCAN Patient Services Case Manager based in Florida. I know I'm in the right job at the right place. Nothing is more important to me than helping patients and loved ones who are looking for information, connection, community and kindness in the face of a pancreatic cancer diagnosis. I love helping people. To those who have lost someone to the disease, I hope you're encouraged by PanCAN's strides in research, advocacy and patient support. We're making progress, and that's thanks to you.

With hope,

Deb Scilingo

P.S. My love for what I do is contagious – my son Anthony decided he wanted to work at PanCAN too, and now he does!

Advocacy Highlights: Going Further, Faster

Hi there!

I'm JB Jaso and I'm the Affiliate Chair for PanCAN's Orange County, CA Affiliate. I'm also a huge advocate for patients. My best friend from high school, Tyler, died of pancreatic cancer when he was just 29. I went to PanCAN Advocacy Day in Washington, D.C., with Tyler and his parents in 2010, and I've been an advocate ever since. Tyler knew what he wanted in life, and he went after it all. He was all about living every day to the fullest – going faster, further and having fun doing it. That's what I try to do in my life today to honor the memory of my friend. Tyler was known for his spark, and I want to continue carrying on that spark for him. Thank you for doing the same through your involvement.

With gratitude,

JB Jaso

[READ MORE OF MY STORY](#)

Year-round, your advocacy drives progress. Thanks to you, the Department of Defense dedicated Pancreatic Cancer Research Program was created and **\$15 million** was devoted to promising research projects. Now you're urging Congress to increase the investment to **\$20 million** and your advocacy continues to increase the pancreatic cancer research investment at the National Cancer Institute – let's keep that momentum going! Your voice matters!

JB Jaso with his friend Tyler Noesen's parents, Yvonne and Dennis;
Tyler is pictured in the background

"When I first started in pancreatic cancer research, grant support was low. Your advocacy has led to greater support for pancreatic cancer federal research funding. This has fostered an increase in the number of researchers and brought new ideas that invigorate the field. And we've taken significant, major steps forward in terms of progress."

**– Channing Der, PhD, UNC-Chapel Hill; PanCAN research grant recipient;
member, PanCAN Scientific & Medical Advisory Board**

PanCAN PurpleStride: Never Underestimate Your Power

PanCAN PurpleStride One Big Day Speeds Change

You took local action and had nationwide impact at PanCAN PurpleStride on April 30, 2022 – **One Big Day of 60 in-person events** across the country!

Over 56,000 in our PanCAN family participated, raising **\$15.8 million**.

Huge shoutout to the top three fundraising teams: **Team Taylor**, **Team Cedars-Sinai Whippers** and **Team Andra**. And to the top three individual fundraisers: **Nicholas Nissen, MD**, **Art Taylor** and **Tracey Early**. Thank you!

Since the first PanCAN PurpleStride in 2007, you've raised **over \$144 million** – funding innovative research and free, one-to-one patient and caregiver support.

One Big Thank You to **Mindy Kaling**, our 2022 PanCAN PurpleStride Ambassador!

Thank you to all the passionate public figures whose PanCAN PurpleStride teams put a bigger spotlight on pancreatic cancer: **Melissa Gilbert**, **Jean and Nicky Trebek**, **Rosario Dawson**, **Josh Stamberg**, **Kitty Swink**, **Armin Shimerman**, **Jonathan Frakes**, **Lisa Swayze**, **Dan Fogelman**, **Tony Brown** and the **family of Rep. John R. Lewis**.

The Singh family at PanCAN PurpleStride Los Angeles 2022.
Angad Singh is on the far left.

Hello, everyone.

I'm Angad Singh. My family and I attended PanCAN PurpleStride Los Angeles in 2022 – we had a team for the first year and raised over \$5,300. As a PanCAN PurpleStride Grand Club member (which means I raised over \$1,000 for PanCAN for a total of \$2,400), and a PanCAN volunteer, you can't underestimate the collective good we can all do in fighting back against this disease. With that said, a special shoutout to my fellow Grand Club members – 48% of all PurpleStride funds are raised by members like us and I encourage everybody to strive for Grand Club in 2023! And to everyone who went to or donated to PurpleStride on April 30, we are grateful because it means more research, more help for people fighting this disease, and more fuel to get us to a day when there is no more pancreatic cancer!

Angad Singh
Captain, Team Singh

Volunteers Move the Mission Forward

Hi, PanCAN friends!

I'm Niketa Miller from Madison, Wis., a PanCAN volunteer and PurpleStride sponsor and fundraiser. I do this on behalf of my grandmother, who I affectionately called "My Lady." She was my partner in crime. I got involved with PanCAN in 2009 when she was diagnosed – she enjoyed volunteering, so it was only fitting that I would do the same. I was a volunteer leader in the PanCAN Madison Affiliate, and I formed a team for PanCAN PurpleStride Madison. Ten years later, our team raised our most ever with over \$17,000 for PanCAN! In 2021 I started the Ebony Eyes Foundation to honor my grandmother and we now sponsor PanCAN PurpleStride Madison. It's a great honor to support PanCAN in tribute to my grandmother. Thank you for moving the mission forward with me!

Your Fundraising Momentum

Hi everyone,

Marco Argenti here, coming to you from New York City. My passion for giving back started five years ago when I lost my dear friend Matt to pancreatic cancer. I started a Wage Hope My Way event for PanCAN to raise money through a concert with my band. Matt and I had been in the band together and it seemed like a great way to honor him. When PanCAN later asked me to serve on the Board of Directors, I was thrilled. I had wanted to do more. I've been involved in many ways, including giving to support new early detection and treatment options. I pledged to raise \$1 million for PanCAN after Matt died, and just a few months ago, I did! Thank you to everyone who helped me do that!

With a desire to do more,

Marco Argenti

Heather Keil Stern at the 2021 New York City Marathon

Dear PanCAN supporters,

My name is Heather and I live in New York. Not long ago I laced up my running shoes and did the New York City Marathon to raise money for PanCAN. Through my Wage Hope My Way fundraising page, I was able to bring in \$38,000 from friends and family just by telling my story. People gave in tribute to my mom, who passed away from pancreatic cancer over 10 years ago. My family has been very involved with PanCAN PurpleStride for years, and together we've raised over \$425,000. I encourage you to consider running for the cause, participating in a marathon or half-marathon for PanCAN. If I can do it, so can you. Quitting was not an option when it came to crossing that finish line!

Let's keep the momentum going.

With love,

Heather Keil Stern

We Covered a Lot of Ground Together This Year!

We wish we could fit all your passion from all 50 states into our Impact Report! We are so grateful for your commitment. It's because of you that we can help people anywhere in the country. All of your hard work gets the word out there about PanCAN and it's paying off – the public's knowledge of PanCAN increased from 14 to 15% this year and we're going for 30% by 2030. Just more for you to feel good about!

A special thank you to everyone who shared their inspiring stories with us this year, and took the time to be interviewed, photographed, and participate in videos and webinars.

You're Driving Progress Toward Priority Goals

All roads lead to PanCAN's priority goals, and thanks to your partnership, we're getting closer each day. Growing awareness of PanCAN to 30% and raising \$80 million annually by 2030 will help ensure that more patients know how to get free information and resources to fight pancreatic cancer, and that more funding can lead to faster progress in research, new treatments and early detection. Hitting these goals will help increase the survival rate to 20%.

The movement you started is only getting stronger. You're making a big impact — let's keep it going!

PanCAN's 2030 Goals

17% **Grow PanCAN's Awareness to 30%**

\$60 **Raise \$80M Annually**

On the Road to Doubling Survival by 2030

Drive 5-Year Survival to 20%

If you'd like to do even more for patients and families, consider taking action in these ways:

- Make a personal gift
- Refer people to PanCAN Patient Services at 877-2-PANCAN
- Participate in PanCAN PurpleStride – One Big Day of taking steps to end pancreatic cancer – Saturday, April 29, 2023!
- Volunteer with your local PanCAN affiliate
- Become an advocate
- Ask your company to donate or sponsor a PanCAN event, or to match your donation to PanCAN
- Host your own fundraiser
