

PanCAN KNOW YOUR TUMOR[®]

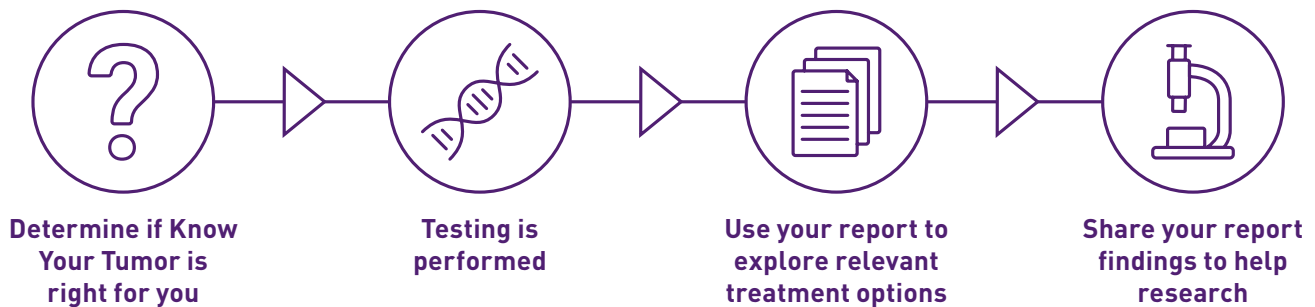

POWERFUL KNOWLEDGE. PERSONALIZED TREATMENT.[®]

PANCREATIC
CANCER
ACTION
NETWORK[®]

Our Know Your Tumor precision medicine service, provided in partnership with Tempus, provides eligible pancreatic cancer patients and their oncologists with information about the patient's biology through tumor tissue biomarker testing and genetic testing for inherited mutations. This information can help patients and their healthcare team select treatment options, including clinical trials, that are likely to work best for the individual patient.

Every pancreatic cancer patient is different.
Patients who receive treatment based on
their biology can live longer.

HOW KNOW YOUR TUMOR WORKS

“**Targeting the treatment to the tumor mutation has made a huge difference in the quality of my life and in my scan results.**”

Linda, Survivor
